

NOKIA SIEMENS NETWORKS ATP PROJECT

Client : Nokia Siemens Networks
I&C by : Tyco Electronics
Location : National
Contract Value : £5,000,000

Tyco Electronics undertook the I&C of over 950 Microwave links in the Exeter, Theale, Banbury, Hayes and Warrington Regions.

The only Contractor to be utilised from start to finish of the Project, we ensured the successful and timely completion of the two Regions we were dedicated to, namely Theale and Hayes.

These were the only 2 Regions to finish on time.

The Project called down more than just I&C; we also supplied Migration Engineers, undertook Line of Sight at the Projects inception and were instrumental in the development of standards throughout the Project.
